

Terry Griffin

UI/UX Developer | Life Wonderer

bigdrumr.github.io · jtgrffn@gmail.com · 919.672.8198

I'm a budding front-end web developer, whose focus is responsive, mobile-first design. I wish to enhance my skills for designing and building elegant, light-weight, sexy UIs with JavaScript and CSS. My practice is young, but I'm a life wonderer and self-teacher of many skills, including automotive and appliance repair, playing several musical instruments, and safely felling trees.

UI/UX Dev · SocialCompany, Inc · Madison, WI

March 2015 – July 2015

I co-wrote a successful order-entry interface prototype for a major client. I wrote most of the structural HTML, CSS, and skin-level interactivity with JavaScript / jQuery.

- Two-way data-binding with vanilla JS
- Elegant styles-toggling with LESS.js and jQuery
- Parallax and CSS animations
- Wire-framing and UX documentation
- Branching with GIT and Terminal
- Local hosting with Apache (Mac)

UI/UX Dev · 100X · Madison, WI

September 2014 – March 2015

I built the team website (100xteam.townsqua.re), skinned the first alpha-version of a full-M.E.A.N stack commercial web-app, wire-framed the second version, and mocked up a marketing site with HTML, CSS, and Skrollr parallax.

- PSD-to-HTML workflow
- CSS and skinning with Bootstrap and LESS.js
- HTML templating with AngularJS and Mustache/HandlebarsJS
- Bi-weekly iterative builds and daily scrum meetings
- Worked onsite and remote with Slack, Asana, and GIT branching

Teacher · Emerson Waldorf High · Chapel Hill, NC

2012 – 2013

I instructed and taught age-appropriate project creation and critical thinking of US history and current events for 9th, 10th, 11th, and 12th grades. I envisioned, developed, and carried out daily lesson plans.
